Android Devices
Connecting your Android device to the Wi-Fi Network

Before using these instruction please “forget” any previous WiFi connections to Oldham College and uninstall any Smart Connect software.

Go to Settings > Wi-Fi, the list of available SSIDs will appear. Select College_WiFi

![Wi-Fi Network List]

Open your Default browser and type gateway.oldham.ac.uk you will be directed to the Acceptable use policy. Please read and accept.
Enter your username and password, and press Login

Once logged in, you will be asked to connect to the secure network

Now press **1. Install the smart connect android App**, via the link on screen

*To connect to the network please install the Smart Connect App and then use the 'connect to the secure network' link.*

1. Install the Smart Connect Android App
2. Connect to the secure network
Press install. This will install the App onto your device

When the software is installed, **Do not press Open** press the back button highlighted in red circled below.
You will be returned to the connect page, now press **2. Connect to a secure network**

You will be connected to OC_Connect and directed to the Oldham College web page.
You will now be connected to OC_Connect

Now that you have installed your device onto the Wi-Fi network, it will be remembered when you are within range of the OC_Connect SSID. You will not be asked to log in with this device again. Your device will auto connect to the network.

Trouble Shooting Guide

I can't download the software to the device – You need to be an Administrator and have relevant passwords to the device you are trying to install the software. If you do not have these options, you cannot install the software.

My username and password are not being accepted – You need to enter the same username and password that you use to log onto the college/UCO systems.

I don’t have any internet access – Check that you are connected to OC_Connect. If you are not connected to this network, please follow the installation guidelines and install the software again.

I’m connected to the internet, but certain pages are blocked that I can view on the main network – This is because there is a different filter on the Wi-Fi network. All the filtering is provided and monitored by the college under the PREVENT Regulations

How many devices can I connect at one time - You can connect two personal devices to the Wi-Fi network.

Where can I use my devices – Once registered, you can use your devices at both the College and UCO Campus. You will not be asked to login, you will automatically connect to OC_Connect

I have a new device that I want to connect - If you replace your device, you will need to follow the above steps to connect to the Wi-Fi network.

My device has stopped connecting - If you do not use your device on the college network within 60 days, you will need to follow the above steps to add your device back to the Wi-Fi network.
Apple/iOS Devices
Connecting your Apple/iOS devices to the Wi-Fi Network

Goto Settings > Wi-Fi, the list of available SSID’s will appear. Select College_WiFi

Open your browser and type gateway.oldham.ac.uk you will be directed to the below page.

Enter your username and password, and press Login
Once logged in, you will be directed to install the IOS Network Profile.

You will receive a prompt for the setting to show your configuration profile, press Allow.

Press install. This will install the Wi-Fi profile onto your device.
Depending on your phone’s security settings, you may be prompted to enter your phone’s password.

You will be asked to install a certificate, press install

Installing the certificate “oldham-PORTAL-CA-1” will add it to the list of trusted certificates on your iPhone. This certificate will not be trusted for websites until you enable it in Certificate Trust Settings.

Confirm the installation of the certificate
Once the certificate is installed, press Done

Now go to Settings > General > About > Certificate Trust Settings

You will see the certificate trust settings, Enable both certificates
Press continue to install the root certificate.

You will now be connected to OC_Connect

Now that you have installed your device onto the Wi-Fi network, it will be remembered when you are within range of the OC_Connect SSID. You will not be asked to log in with this device again. Your device will auto connect to the network.

Windows/Laptop Devices
Connecting Your Windows/Laptop devices to the Wi-Fi Network

Press the Wi-Fi settings icon in the taskbar, select College_WiFi and press connect.

You will be presented with the college acceptable usage policy, press accept.
Enter your username and password, and press Login

On the Connect to the secure network page, Press Click here to download smart connect
You will be asked to Run, Save, Cancel the software. Press Run

The Fortinet page will appear with your username and password, press Start
Once the Smart connect is download and installed, press connect for network access.

Once connected, you will see Wireless connection successful page. Press Close.
The Oldham College Website page will appear once connected.

Press the Wi-Fi settings icon in the taskbar, and you will be connected to OC-Connect.

Now that you have installed your device onto the Wi-Fi network, it will be remembered when you are within range of the OC_Connect SSID. You will not be asked to log in with this device again. Your device will auto connect to the network.
